Digital Editing Annual Plan required

Save time and gain confidence with AJE's powerful machine learning technology

AJE Digital Editing was built for researchers. It is a fast and flexible editing tool you can use for all your academic writing.

The AI that powers AJE Digital has been trained on millions of edits by PhD-level editors from more than 447 areas of study and over 2000 field-specific topics. Unlike our competitors, who train their AI only on papers that have already been edited, we train our AI on both the original and edited files—allowing us to make up to 3 times more changes with over 95% accuracy.

Fast and affordable

Corrects grammatical errors and improves phrasing and word choice to ensure your manuscript is judged for the quality of the research, not the quality of the language
