## Surgical correction of infundibular muscular ventricular septal defect in a *cat*: a case report.

Ventricular septal defects (VSDs) can lead to congestive heart failure and pulmonary hypertension, particularly in patients with large shunts. However, no surgical treatment for feline VSD has been... [Show more](#)

# How to access the database

The screenshot shows the website [baze.nsk.hr/pretraga-baza/?fch=c](http://baze.nsk.hr/pretraga-baza/?fch=c). The page title is "Portal elektroničkih izvora za hrvatsku akademsku i znanstvenu zajednicu". Below the title is a large image of a modern building. A navigation bar contains links: Naslovnica, O portalu, Novosti, Kontakt, Često postavljana pitanja, Proxy, Statistike, and Projekt e-Izvori. On the left, there is a search section titled "Pronađite bazu" with a text input field "Upišite naziv baze..." and a "Pretraži" button. Below this is a section "Baze po područjima" with links for "Biomedicina i zdravstvo" and "Biotehničke znanosti". On the right, there is a section "Pregled baza po abecedi" with a list of letters A through Z and "Sve". The letter 'C' is highlighted, and a red box highlights the "CAB Abstracts" entry, which includes the text "Vrsta baze: Bibliografska baza", "Područja: Biotehničke znanosti", and a link "Pročitaj više".
